EDUCATION

BS, Applied and Computational Mathematics (ACME)

Apr 2028

Brigham Young University

Provo, UT

- Minor: Computer Science
- Relevant Coursework: Linear Algebra, Mathematical Analysis, Algorithms and Optimization, Ordinary Differential Equations, Advanced Software Construction, Data Structures and Algorithms

SKILLS

- Python (NumPy, Matplotlib, Django), SQL, C++, Java, JavaScript
- Linux

EXPERIENCE

Treeline Group Inc.

Apr 2024-Sep 2024, Sep 2025-August 2026

Full Stack Web Developer

Provo, UT

- Created a database management tool using Django and Docker's Python API that exposed difficult-to-reproduce databases on the LAN for simpler development
- Integrated version control into large legacy projects
- Wrote a subscriptions app for Django using Authorize.net to unify how subscriptions are handled across projects and speed up future development

BYU Pathways

Apr 2021-Aug 2021

Research Assistant

Salt Lake City, UT

- Wrote instructional documents pertaining to chatbot development
- Analyzed chatbot conversations to improve user experience

Bright Bridge Web LLC

Sep 2018-Mar 2021

Full Stack Web Developer

Provo, UT

- Led the development of 2 e-commerce projects from start to deployment
- Created company-wide training material for Django best practices
- Collaborated with designers, sales representatives, and upper management to facilitate the development and maintenance of dozens of web applications
- Used Django, celery, AWS, and Vimeo to create a web admin tool for extracting, processing, and storing large indexed media collections for a streaming site

PERSONAL PROJECT

Video Streaming System - github.com/iscobar456/dronecam

May 2026

- Created a signaling server using Node.js and WebSockets to facilitate WebRTC connections between streaming device and observer peers
- Created an executable using C++, GStreamer, libdatachannel, and CMake which interfaces with the signaling server, processes and streams video data to observer peers
- Created a web interface using Sveltekit for observers to connect to and observe footage from devices running the streaming executable

VOLUNTEER EXPERIENCE

The Church of Jesus Christ of Latter-day Saints

Feb 2022-Feb 2024

Full-time Volunteer

Accra, Ghana

- Automated report generation using Google Apps Scripts and JavaScript
- Trained other volunteers on service-related guidelines and standards
